PROFESSIONAL SUMMARY

Web Developer and Technology Operations Professional with experience in designing and developing modern web applications, managing IT infrastructure, and supporting digital transformation initiatives. Skilled in full-stack web development, system administration, and cybersecurity, with the ability to build scalable digital platforms and solve complex technical challenges.

Experienced in working within technology-driven environments where software development, operational systems, and innovation intersect. Adept at combining technical expertise with strategic thinking to support organizational growth, digital innovation, and efficient technology operations.

CORE COMPETENCIES

Full-Stack Web Development
Software Development & Coding
Cybersecurity & Network Infrastructure
IT Operations & System Administration
Digital Transformation Strategy
Startup Development & Business Structuring
Enterprise Organizational Architecture
Strategic Partnerships & Ecosystem Development

PROFESSIONAL EXPERIENCE

Oderson Holdings Ltd

Chief Digital Assets & Innovation Officer
2025 – 2026

Led digital strategy and technology management across a multi-company ecosystem, overseeing digital platforms, innovation initiatives, and digital asset governance.

Key contributions:

- Managed and secured digital assets and technology systems across multiple subsidiaries.
- Led digital transformation initiatives aimed at improving internal operations and digital capabilities.
- Developed strategic technology partnerships and supported innovation initiatives within the organization.
- Implemented digital systems that improved operational efficiency and collaboration across departments.
- Coordinated technology development and digital initiatives between different business units.

Technology Subsidiary – Oderson Holdings

Chief Operations Officer

Oversaw operational management across multiple divisions within the organization and ensured coordination between departments to support business growth.

Key responsibilities:

- Supervised Marketing, Production, Customer Relations, and Certification divisions.
- Coordinated operational strategy across departments and management teams.
- Implemented organizational structures designed to support scalability and efficient operations.
- Managed operational performance and improved cross-department collaboration.

IWACU Recovery Centre – Kigali

IT Support & System Administrator

2019 – 2024

Provided IT infrastructure support and cybersecurity management while ensuring stable and secure technology operations for the organization.

Key responsibilities:

- Managed network infrastructure and cybersecurity systems.
- Implemented firewall protection, antivirus systems, and security protocols.
- Provided system administration, troubleshooting, and technical support to staff.
- Maintained data backup systems and data recovery procedures.
- Conducted cybersecurity awareness training for employees.

Primates Africa – Musanze

Web Developer

2023 – 2024

Developed and maintained web platforms while improving the overall performance and user experience of digital systems.

Key responsibilities:

- Designed and developed secure web applications and digital platforms.
- Improved website functionality and user experience.
- Implemented security updates and system optimizations.

PROJECTS

Personal Developer Portfolio

<http://jean-aime-portfolio.vercel.app/>

Designed and developed a personal developer portfolio website to showcase projects, technical skills, and professional experience.

Highlights:

- Built a responsive web portfolio showcasing development projects.
- Demonstrates technical capabilities and development experience.
- Integrated GitHub repositories and project demonstrations.

Open-Source & Development Projects

GitHub: <https://github.com/Jean-Aime>

Developed and maintained coding projects demonstrating web development and problem-solving capabilities.

Highlights:

- Built software and web development projects demonstrating technical skills.
- Applied Git and version control practices for project management.
- Developed solutions demonstrating programming and development expertise.

EDUCATION

A0 Industrial Information Technology

INES Ruhengeri – Musanze
2022 – 2024

A2 Software Development

BULINGA TVT School – Muhanga
2018 – 2021

CERTIFICATIONS

Artificial Intelligence Ethics
Machine Learning & Deep Learning
Natural Language Processing & Computer Vision
IBM Watson AI Model Deployment
Mastering the Art of Prompt Engineering
ALX Professional Foundations

TECHNICAL SKILLS

Frontend Development

React.js, TypeScript, Tailwind CSS

Backend Development

Node.js, Express.js, PHP

Web Development

Web Application Development
Responsive Web Design

Infrastructure & Security

Cybersecurity & Network Security
System Administration & IT Infrastructure
Network Automation & Cloud Systems
Incident Response & Risk Management

BUSINESS & LEADERSHIP SKILLS

Startup Company Structuring
Corporate Governance Design
Enterprise Organizational Architecture

Operational Division Management
Strategic Partnerships Development
Business Leveraging & Ecosystem Strategy
Innovation Management
